Post your Work on Github Project:
Git Commands Documentation

Programming for Data Science with Python Nanodegree

You will use this template to copy and paste the git commands you used to complete all tasks on your local and remote git repository for this project. This file will serve as your submission for the GitHub project.

Instructions:

1) Make a copy of this Git Commands Documentation template on your Google Drive.
2) Complete the four sections in this document with the appropriate git commands.
3) Download this document as a PDF file.
4) Submit this on the Project Submission page within the Udacity Classroom.
